Work Experience

Front End Web Developer - Astonish Results

March 2011 – Present

Front end developer for a digital marketing company specializing in marketing tools for independent insurance agents. Responsible for the build of UI/UX elements, writing custom jQuery plugins and modules that interact with CMS API to extend the functionality of our sites, and participate in research into the mobile web with HTML5 and responsive CSS frameworks.

PHP / Drupal Module Developer – Yankee Retail Company

September 2010 – March 2011

Web developer and programmer hired to help facilitate the migration from a MIVA storefront site to a dynamic Drupal 6 site. Responsibilities were designing custom Drupal modules to integrate with PayPal's BillMeLater, and an Order Manager (an order fulfillment software), and to also customize and extend modules available from the Drupal community.

Intern/Web Developer – Skycore LLC.

February 2010 – April 2010

Responsible for adding functionality to their industry leading mobile messaging site cellyspace.com, also for building an API for developers to interact with codereadr.com, an iPhone / Blackberry barcode scanner and real time web service for scanning, generating, storing, and validating barcodes.
